

ENVIRONMENTAL POLICY

Stewart EFI is a leading provider of precision drawn and stamped metal components, metal finishing and assemblies for markets worldwide. In that capacity, we believe in employing sound practices to minimize our impact on the environment and create sustainability. In our manufacturing processes we are committed to:

- Conserving natural resources
- Meeting or exceeding all requirements associated with applicable environmental regulations.
- Maintaining continuous improvement programs to reduce our environmental impact.
- Having a reputation as an environmentally responsible member of the communities in which we operate
- Promoting environmental responsibility within our industry
